

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## MI Activus Diversified Fund (“the Fund”) A Accumulation Shares

The Fund is a Sub-Fund of MI Activus Wealth Funds. The Fund is an Open Ended Investment Company. ISIN: GB00BL5B7698  
Maitland Institutional Services Ltd is the Authorised Corporate Director of the Fund.

### Objectives and investment policy

The Fund aims to achieve capital growth (after fees) of at least the UK Consumer Price Index plus 2% per annum, over a three-year period.

Your capital is at risk, however, and there is no guarantee that a positive return will be achieved over three years, or any time period. The Investment Manager has full discretion and will adopt a global multi-asset approach. The asset classes and geographical spread will vary over time.

The Fund may invest indirectly or directly in a diversified portfolio of assets which may include: company shares; bonds; money market instruments; currencies and derivatives and indirectly only in commodities; infrastructure; private equity (which is money invested in firms which are not listed on any stock exchange) and real estate to the extent that each is permitted by the Regulations.

The Fund will typically invest about 80% of the portfolio indirectly but at times, the Investment Manager may decide to invest directly where it considers efficient to do so, therefore, the indirect exposure may be higher or lower than 80% but is never expected to fall below 60%. Indirect exposure will be achieved through other investment funds and exchange traded funds anywhere in the world and in any sector. These other funds may be managed by the authorised corporate director or other third party managers. They may be actively managed or passively managed (that is funds which track or are closely linked to the performance of an index). Investment into passive funds will be limited to 20%.

The Fund is actively managed with a bias towards lower volatility assets such as alternatives and fixed income.

Typically, indirect or direct exposure in the Fund will be balanced between bonds, company shares and alternative assets (such as infrastructure and commodities), however, the asset allocation may vary significantly to protect the Fund in adverse market conditions or to pursue potential growth opportunities that arise. Asset allocation to any one of these sectors will not fall below 15% at any time.

The bonds and money market instruments which can be held by the Fund may be investment grade and/or sub-investment grade and are like loans to companies, governments and other organisations that can pay a fixed or variable interest rate and may be issued anywhere in the world. They are classified by rating agencies for their creditworthiness: those rated ‘investment grade’ generally carry a relatively low risk of default but also tend to offer lower yields than ‘non-investment grade’ bonds which in turn, generally have a higher risk of default but also tend to offer higher yields.

The Fund may use derivatives which are sophisticated instruments whose value is linked to the rise and fall of prices of other assets. Derivatives may be used for limited investment purposes to achieve the investment objective and for the purposes of efficient portfolio management, to simply reduce risk or manage the Fund more efficiently.

Any income this share class generates will be reinvested to grow the value of your investment.

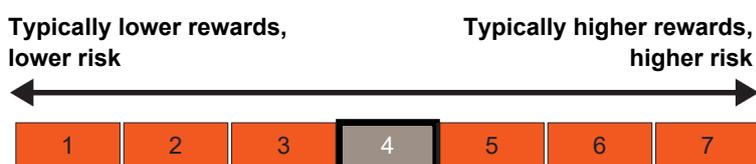

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

For full investment objectives and policy details please refer to the prospectus.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

- This Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- The Fund invests into other funds which themselves invest in assets such as bonds, company shares, derivatives, cash and currencies. The objectives and risk profiles of these underlying funds may not be fully in line with those of this Fund.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond. There may be cases where the organisation from which we buy a bond fails to carry out its obligations, which could cause losses to the Fund.
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease and increase.
- This Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movement. This may result in gains or losses that are greater than the original amount invested.
- For further risk information please see the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

Ongoing charges	2.09%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

## Past performance

There is insufficient data to provide a useful indication of past performance to investors.

- The ongoing charges figure is estimated because the share/unit class is relatively new and has insufficient track record for us to calculate it exactly. The ongoing charges figure may vary from year to year and will exclude the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charge, the figure is estimated as at 28 February 2022.
- You may also be charged a dilution levy on entry to or exit from the Fund, this is to cover costs associated with your transaction.
- For more information about charges, please see the prospectus.

- Fund launch date: 01/09/2021.
- Share/unit class launch date: 01/09/2021.
